

Aaron Green

agreen@disputesoft.com
301.251.6313

At DisputeSoft, Aaron assists in preparing expert, rebuttal, and investigative reports by reviewing disputed source code, databases, and various computer systems. His knowledge of data science, scripting, and object oriented programming allows him to effectively assist clients with the technical aspects of software-related matters, including matters involving allegations of software misappropriation and intellectual property infringement.

Aaron recently graduated from the University of Maryland with a B.S. in Computer Science, and a B.S. in Physics. Throughout college, he strengthened his analytical, teaching, and technological communication skills during his time researching the use of machine learning in improving intraocular pressure measurements. Aaron also conducted multidisciplinary research within physics and computer science, which included exploring novel quantum materials and developing a fully proven quantum programming language.

EDUCATION

B.S., Computer Science, University of Maryland

B.S., Physics, University of Maryland
